

Problem – 1 – Working with TabLayout

Problem 2: Create a Login page for the Walmart store as per the screen produced below.

The image shows a smartphone screen displaying the Walmart Login page. The status bar at the top shows a warning icon, 4G signal, battery level, and time 3:44. The page has a purple header with 'Walmart Login'. Below it is the Walmart logo and the text 'Sign in to your account'. There are two input fields: 'Email Address(required)' with a placeholder 'Email Address*' and 'Password (required)' with a placeholder 'Password*'. A 'Forgot Password?' link is to the right of the password field. At the bottom, there is a purple 'SIGN IN' button, a link 'Don't have a Account?' with a horizontal line, and a black 'CREATE ACCOUNT' button. The Android navigation bar is at the very bottom.
